

## ABSTRACT OF THE DISCLOSURE

An inhibitor composition of Helicobacter pylori adhesion in the stomach comprises (1) anti-urease antibodies obtained from eggs laid by hens which have  
5 been immunized against H. pylori urease and (2) an inhibitor of gastric acid secretion. This inhibitor is capable of completely eliminating H. pylori from the stomach, so it is useful for the prevention or treatment of diseases caused by infection of H. pylori such as peptic ulcers.
